Immediate Release

April 6, 2015

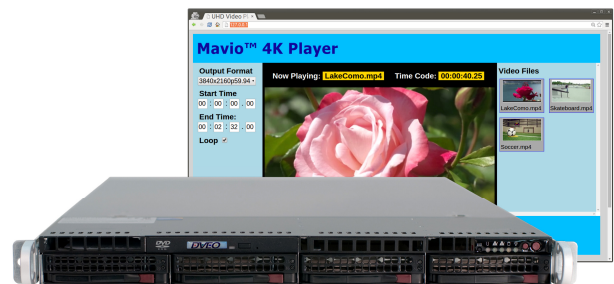

NAB Booth SU6605

At NAB 2015, DVEO to Debut 4K Ultra HD Player for Video Walls, Museums, Digital Signage, UHD Demonstrations, Post-Production, and Broadcast Testing

**Linux® Based Mavio™ 4K Player is Designed to Ingest 4K Content
on to its Local Hard Drive via 10 GigE**

San Diego, California -- DVEO, the broadcast division of Computer Modules, Inc. (CMI), will demonstrate their new 4K Ultra HD 60 fps player at booth SU6605 at the NAB (National Association of Broadcasters) Show, April 13-16, in Las Vegas, Nevada.

Available in Autumn 2015, the Mavio™ 4K Player plays 3840 x 2160 Ultra HD or 4096x2160 4K Cinema. It ingests H.264/AVC or other compression format 4K content to its local hard drive via USB, or via 10 GigE. The system outputs 4K, 60 fps, 8 or 10 bit video content on SDI output. There is an option to deliver content to a single HDMI 2.0 output using an SDI to HDMI 2.0 converter.

**Mavio™ 4K Player Delivers Ultra HD
for Video Walls, Museums,
Digital Signage, UHD Demonstrations,
Post-Production, and Broadcast Testing**

"The Mavio 4K Player at NAB is a milestone product," commented Laszlo Zoltan, Vice President of DVEO. "It demonstrates that DVEO is at the forefront of video de-compression technologies. 4K players provide "cinema" quality at consumer prices. A 4K player provides a stepping stone to cost effective 4K compression, which is now just around the corner."

The Mavio 4K Player outputs Quad Link 3G SDI, YUV422 (8/10 bit), or optional tri-level/bi-level Genlock. It outputs up to 16 channels of embedded audio (PCM or precompressed).

Supplemental Information for Press Release

Features:

- Resolutions: 3840 x 2160, 4096 x 2160
- Frame rates: 23.98, 24, 25, 29.97, 30.0, 50.0, 59.94, 60.0 fps
- 8 or 10 bit color depth
- Quad-Link 3G HD-SDI output YUV422, compliant with SMPTE 424M
- Customized playlist or looping playback
- Inputs include 10 GigE for IP ingest
- Video compression formats include H.264/AVC, ProRes, MJPEG, and more
