Immediate Release

April 13, 2012

**Penta – NAB Booth N214
DVEO – NAB Booth SU2114**

DVEO to Distribute Penta Class 1 HD2line Broadcast LCD Monitors for Broadcasting, Field, and Studio Use

New York, New York -- Penta Studiotech, a German manufacturer of high-end professional broadcast monitors, announced today that it has entered into a reseller agreement with DVEO, the broadcast division of Computer Modules, Inc. (CMI). Both companies will exhibit at the NAB Show, April 16-19, in Las Vegas, Nevada – Penta in Booth N214 and DVEO in Booth SU2114.

DVEO is now selling Penta's outstanding line of professional-grade LCD monitors designed for studio production, ENG-SNG-production vans, master control, post production, high-end editing, camera shading, and quality control. Available in sizes from 17 to 55 inches, these full-featured monitors offer true color reproduction, outstanding gray scale and color depth, and precise picture quality.

Penta monitors feature color calibration software, centralized monitor wall control, and Ethernet based remote control. The color space adjustment guarantees repeatable and precise color reproduction compliant to EBU, SMPTE and ITU .709 standards. The rugged design has no fans or noise. All of the monitors are available with a Quad-Split option which displays UMD in each quadrant and 4 audio channels.

For Penta's HD2line series monitors, supported video inputs include analog composite (PAL, NTSC and SECAM), analog components RGB and Y-Cr-Cb, and SD/HD-SDI signals up to 3Gb/sec 10-Bit 50/60i & 24/25/30p/psf with auto detection.

The HD2line Pro series monitors feature a modular slot design. Inputs and outputs can be configured as needed. Optional input/output boards can be installed in any of the three board slots, and in almost any combination. Optional boards are recognized automatically by the system without the need to reconfigure the unit. All HD2line Pro displays feature DVI-I, VGA and CVBS inputs. A multi-format 3G/HD/SD-SDI input with an optional fiber optic module supports data rates up to 3 Gb/s and accepts SD-SDI, HD-SDI, Dual-Link HD-SDI, and 3G-SDI.

"Our customers need IP manageable studio monitors," said Laszlo Zoltan, Sales Manager for DVEO. "Penta monitors have a well-deserved reputation for reliability, perfect color accuracy, and IP manageability, at a very reasonable price point."

"We're excited that DVEO has added our monitors to their broad line of broadcast products," stated Markus Unfried, Penta's Vice President for Sales and Marketing. "This will be a very successful partnership for both of our companies."

HD2line and Hd2line Pro are trademarks of Penta Studiotechnik GmbH. DVEO is a trademark of Computer Modules, Inc. All other trademarks and registered trademarks are the properties of their respective owners.
