## Immediate Release

April 10, 2007

NAB Booth SU5026

# DVEO to Launch HDMI to HD-SDI Converter at NAB 2007

## HD Spigot™ to Begin Shipping in April

**San Diego, CA** -- DVEO, the broadcast division of CMI, will demonstrate their new HDMI to HD-SDI converter at the NAB (National Association of Broadcasters) Show in Las Vegas, April 16-19, at Booth SU5026. HD Spigot™ is a small hand held converter between HDMI and HD-SDI.

HDMI has quickly become one of the major standards for uncompressed video in the consumer world. Many input devices support HDMI, such as cameras and recorder/players – and many more are yet to come.

On the professional side, many high definition devices support HD-SDI as the preferred HD input. Most HD encoders

**HD Spigot™**

and HD video servers generally support HD-SDI.

With HD Spigot, broadcasters and content providers can interface new low cost HDMI devices to professional HD-SDI equipment. HD Spigot converts HDMI to HD-SDI in real time. It supports unrestricted (No HDCP) HDMI devices, such as Sony HDV cameras and others. The HD-SDI output is fully compatible with SMPTE 292M. HD Spigot supports 1080i or 720p HD.

“The HD Spigot will save our customers a bundle, since they can use inexpensive HDMI devices. It lets broadcasters use small portable HDMI cameras for remote shoots, sports broadcasts, and electronic news gathering,” stated Laszlo Zoltan, Vice President of Sales for DVEO. “And corporations will find it useful for showing HDMI footage on HD-SDI monitors.”

HD Spigot begins shipping this April. OEM versions will also be available.

## Supplemental Information for Press Release
