Your own world's finest Analyzer

DVB-T/C DVB-T2/C2

THE **DIVICATCH RF-T/C T2/C2** IS A POCKET ANALYZER CUMULATING DVB-T/T2/T2LITE & DVB-C/C2 LIVE RECEPTION WITH MPEG-2 TS REAL-TIME ANALYSIS, RECORDING AND STREAM PLAYING.

The DiviCatch RF-T/C T2/C2 provides **real-time analysis** at different levels:

- **RF**: measures key RF signal parameters (Level, MER, SNR, BER) and indicates the modulation parameters, the constellation as well as the Channel Impulse Response.
- **MPEG-2 TS**: the 3 priority levels of ETSI TR 101 290 are implemented. Bitrate can be analyzed globally, by service, by PID. Alarm thresholds are customizable.
- **T2-MI**: complete multi-PLP analysis: T2 L1 pre/post signaling, PLP allocation (BB frame, TS, padding/overflow), T2 timestamp, BB frame, ISSY field, PLP extraction; specific **DVB-C2** analysis: L1 specific screen, C2 frame composition, data slice parameters.

Baseband streams can be captured using the **ASI input** or the PC's **IP input**. File-based **offline analysis** is also available.

The alarm events and RF measurements (trends) can be stored into **report files**.

In addition, the DiviCatch RF-T/C T2/C2 can be used as a **gateway** which retransmits **over ASI or IP** the baseband stream coming from the RF input. The TS file **player** functionality allows to have an **ASI output** on the same device, which represents a real added value.

TestTree proposes a real-time analysis application, **DiviSuite**, running on **MS Windows**, connected to the DiviCatch RF-T/C T2/C2 via **USB connectivity**, with customizable monitoring screens. The application integrates a video decoder enabling **real-time decoding** of all unencrypted services (**H.265/HEVC, H.264/MPEG-4 AVC, MPEG-1/2, AAC, MP3...**). It also features live stream capture capabilities for baseband multiplex **recording** into a TS file.

The DiviCatch RF-T/C T2/C2, a 4-in-1 product featuring both **RF** and **baseband** analysis, and both **TS recording** and **player** capabilities, offers a cost-effective test solution for field, lab or head-end applications.
