Immediate Release

May 26, 2008

Anga Cable Booth K66 at Hall 10.2

DVEO and KBS Consulting Ltd. Announce New Products for ANGA Cable 2008 New Systems Include Digital HDTV Modulator

San Diego, CA -- DVEO, the broadcast division of CMI, and KBS Consulting Ltd., the exclusive German distributor of DVEO products, will introduce two innovative new products at the ANGA Cable Show in Cologne, Germany, May 27-29, Booth K66. ANGA Cable is Europe's leading trade show for cable, broadband, and satellite.

eYe Catcher/DVB-C RF Modulator

DVEO's brand new, never before shown in Europe, products at the ANGA Cable Show are:

1. MPEG-2 HD Video Transmitter/Receiver – IP Caster™ FD
2. Small Form Factor Digital HDTV Modulator – eYe Catcher™/DVB-C

MPEG-2 HD Video Transmitter/Receiver – IP Caster™ FD

An affordable alternative to dedicated satellite links, IP Caster FD is an IP gateway that connects HD digital video equipment to computer networks. It sends and receives

both single and multi-program HD MPEG-2 transport streams. It converts HD MPEG-2 transport streams from DVB-ASI to IP in real time, and transmits HD MPEG-2 transport streams over Ethernet-based Internet Protocol (IP) networks and converts them to DVB-ASI. The IP Caster is also available as a single ASI to IP transmitter – the IP Caster Tx, or as a single IP to ASI receiver – the IP Caster Rx.

All three versions of the IP Caster feature Pro-MPEG Code of Practice #3 (CoP3) Forward Error Correction (FEC), for reliable transport of live DVB-ASI video. The IP Caster FD enables broadcasters and content providers to simultaneously stream compressed HD video to and from remote locations.

Small Form Factor Digital HDTV Modulator – eYe Catcher™/DVB-C

The eYe Catcher/DVB-C digital modulator is a unique frequency agile modulator that sends live or recorded video streams to multiple HD monitors via RF over coaxial cable. The input can be IP, USB, DVB-ASI, or a stored transport stream from hard drive (single or multi program transport streams). One DVB-C RF channel can have up to one HD and one SD stream or three SD stream. Additional optional output formats include USA-QAM, DVB-T/H, DVB-S/S2, ISDB-T, and T-DMB. Customers can purchase licenses for additional profiles and upgrade the card immediately. The compact eYe Catcher/DVB-C is suitable for digital signage, trade shows, STB testing, and laboratory applications.

“The compact eYe Catcher/DVB-C is a unique video signal source. We recommend it for CCTV systems. It’s ideal for sending video from a satellite feed or over IP to multiple locations,” stated Guido Koronkai, Senior Sales Engineer for KBS Consulting. “We are proud to sell DVEO’s cutting-edge broadcast products.”

KBS Consulting will also showcase DVEO’s line of DVB Master™ transmit/receive cards (available in both PCI and PCIe), and their real time HDMI to HD-SDI converter – the HD Spigot Out™.

“We’re excited to have KBS Consulting introduce our latest products to Germany,” said Laszlo Zoltan, Sales Manager for DVEO. “Customers appreciate their strong technical experience in digital video technology. We know they’ll be quite successful.”
